

# Education and Outreach at CHESS and G-line

Faculty, Staff and Students, Cornell University **DMR-0225180**

---

CHESS and G-line faculty, staff and graduate students participate in many outreach and educational K-12 activities over the course of the year. An example is the Varna Science Club started by staff scientist Ken Finkelstein for elementary school “scientists in training”. Among the programs organized on Cornell campus by other centers, G-line graduate students regularly participate in the “Career Explorations: Focus for Teens” program this summer (June 30th - July 2). At right is a photo of Aaron Fleet leading a hands-on lecture to a group of high school students on the subject of light, waves, and (ultimately) x-ray diffraction.
